Background

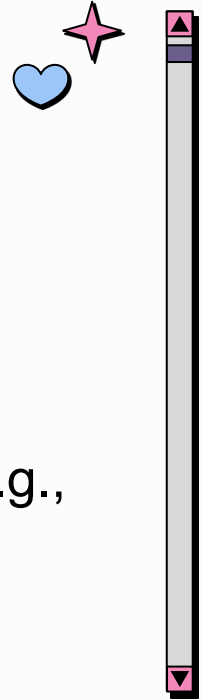

- A personal finance app with multiple features
- Expense Tracking
- Streak Save
-   - Split Bill
- Mystery Item
- Currency Converter

Next

Inspiration

Problem:

- Help people understand and track how much they spend.
- Make it easier to manage and organize expenses.

Target Users:

- College students gaining financial independence.
- People who regularly spend money on shared activities (e.g., friends going out together).

Solution:

- Show users their transactions clearly.
- Help them split and manage shared expenses easily.

Next

Languages Used

- **JavaScript:** Used to make the app interactive and respond to user actions.
- **HTML & CSS:** Used to design and style the app's appearance, such as layouts, colors, and buttons.
- **Python:** Used for the backend, which processes data and handles tasks like saving transactions or splitting expenses.
- **SQL:** Used to manage and store data in a database, such as user information and spending history.

Libraries

- **React:** Helps build the user interface quickly using reusable components.
-  **Firestore:** Provides secure login features and stores user data safely in the cloud.
- **Express:** Helps manage server requests and connects the app to the database smoothly.

Centsible

 **Current Streak: 3 saves in a row!**

Mentorship Program Takeaways

- Met with my mentor on Zoom once a week — it was nice having that regular check-in to stay on track.
- I could always email questions in between meetings.
- Gave great feedback on my app and helped me think about how to organize my code better.
- They shared helpful resources like *The Odin Project* to strengthen my JavaScript skills.
- Helped me understand tricky coding concepts by breaking them down step by step.

Future Plans for Centsible

- Add a receipt upload feature
- Create weekly and monthly spending trackers
- Add more features/components like charts or reminders
- Improve design and usability
- Keep learning and refining the app

Thanks for Listening!
